AWARNING

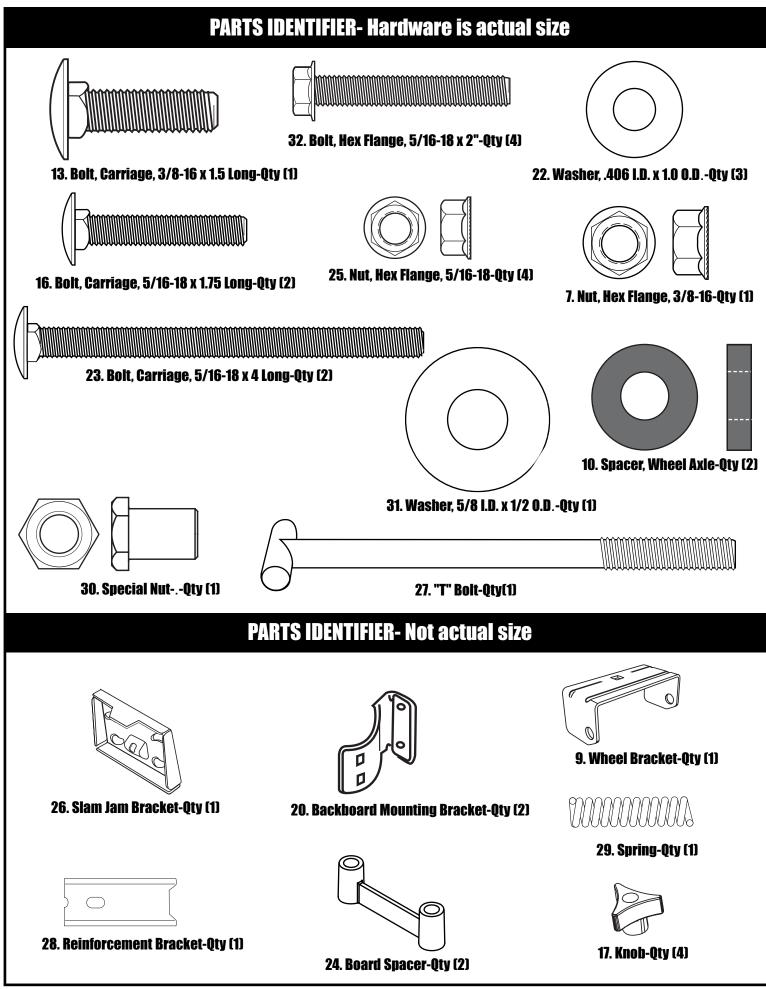

FAILURE TO FOLLOW THESE WARNINGS MAY RESULT IN SERIOUS INJURY AND/OR PROPERTY DAMAGE.

Owner must ensure that all players know and follow these rules for safe operation of the system.

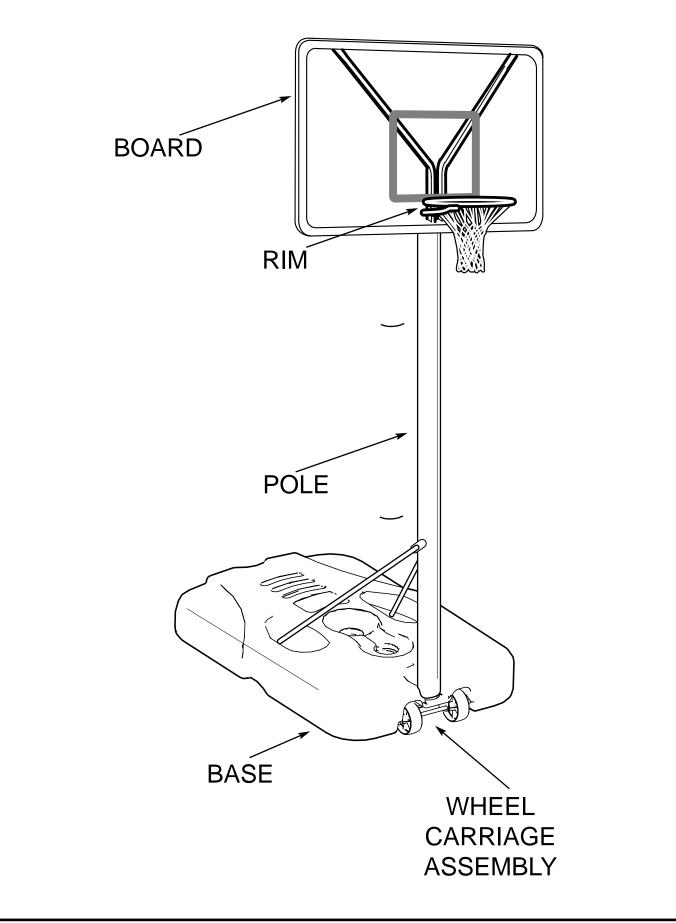

- DO NOT HANG on the rim or any part of the system including backboard, support braces or net.
- During play, especially when performing dunk type activities, keep player's face away from the backboard, rim and net. Serious injury could occur if teeth/face come in contact with backboard, rim or net.
- Do not slide, climb, shake or play on base and/or pole.
- After assembly is complete, fill system completely with water or sand and stake to the ground. Never leave system in an upright position without filling base with weight, as system may tip over causing injuries.
- When adjusting height or moving system, keep hands and fingers away from moving parts.
- Do not allow children to move or adjust system.
- During play, do not wear jewelry (rings, watches, necklaces, etc.). Objects may entangle in net.
- Surface beneath the base must be smooth and free of gravel or other sharp objects. Punctures cause leakage and could cause system to tip over.
- Keep organic material away from pole base. Grass, litter, etc. could cause corrosion and/or deterioration.
- Check pole system for signs of corrosion (rust, pitting, chipping) and repaint with exterior enamel paint. If rust has penetrated through the steel anywhere, replace pole immediately.
- Check system before each use for proper ballast, loose hardware, excessive wear and signs corrosion and repair before use.
- · Check system before each use for instability.
- Do not use system during windy and/or severe weather conditions; system may tip over. Place system in the storage position and/or in an area protected from the wind and free from personal property and/or overhead wires.
- Never play on damaged equipment.
- See instruction manual for proper installation and maintenance.
- When moving system, use caution to keep mechanism from shifting.
- Keep pole top covered with cap at all times.
- Do not allow water in tank to freeze. During sub-freezing weather add non-toxic antifreeze, sand or empty tank completely and store. (Do not use salt.)
- Use extreme caution if placing system on sloped surface. System may tip over more easily.

Get to know the basic parts of your basketball system.....

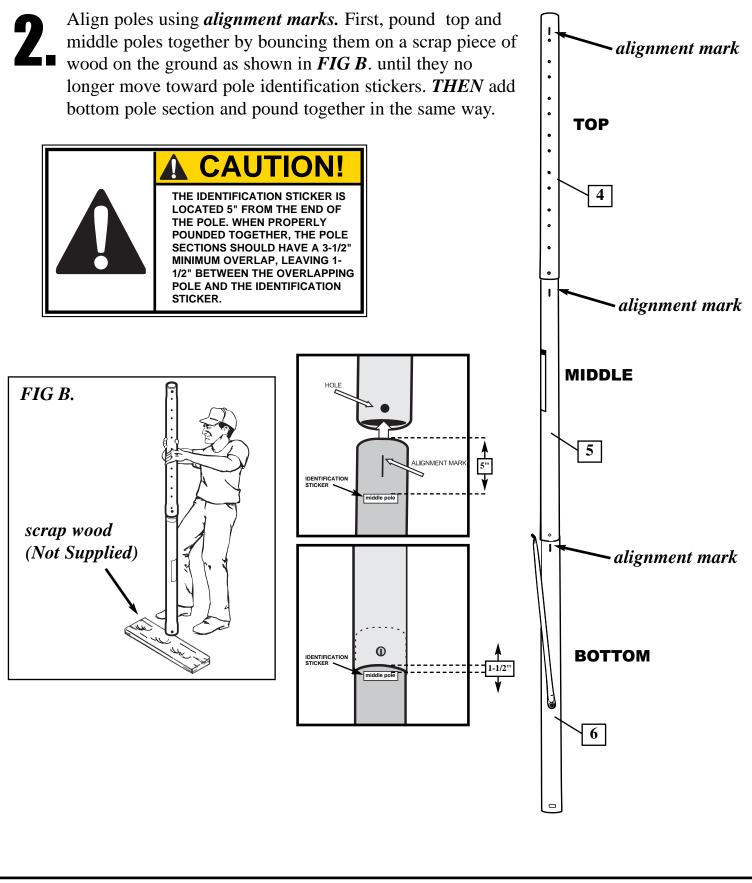

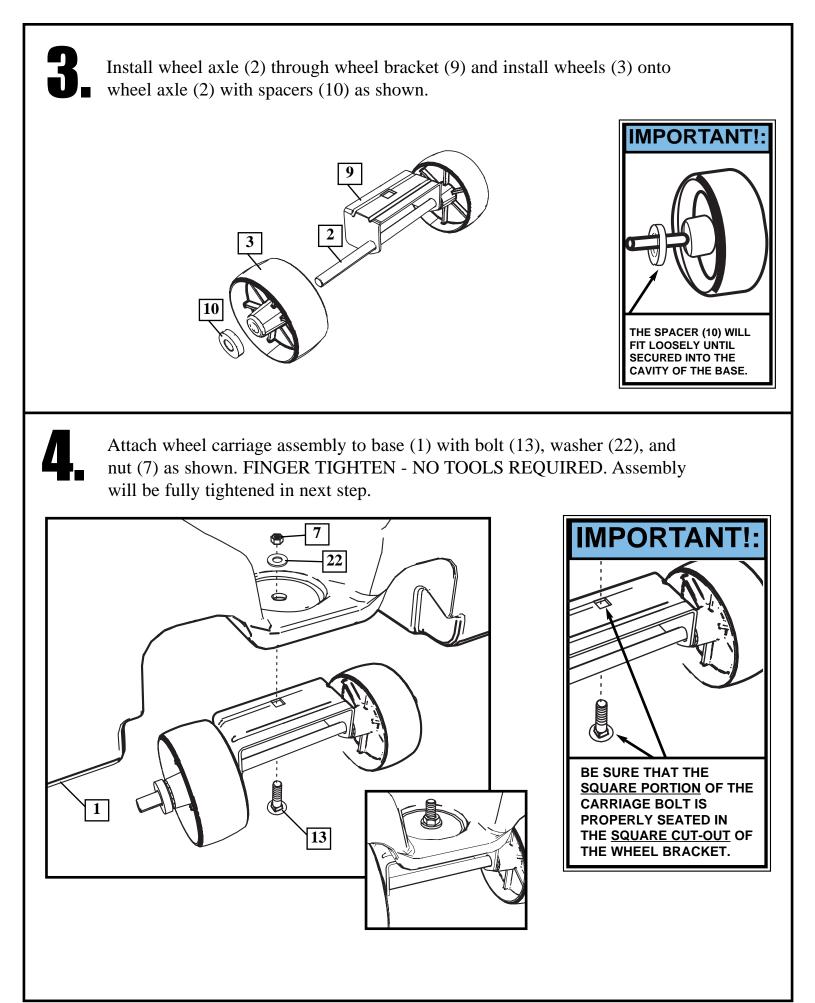

Correctly identify each pole section. Poles have an identification sticker that will be used as a reference point in the next step.

IMPORTANT!

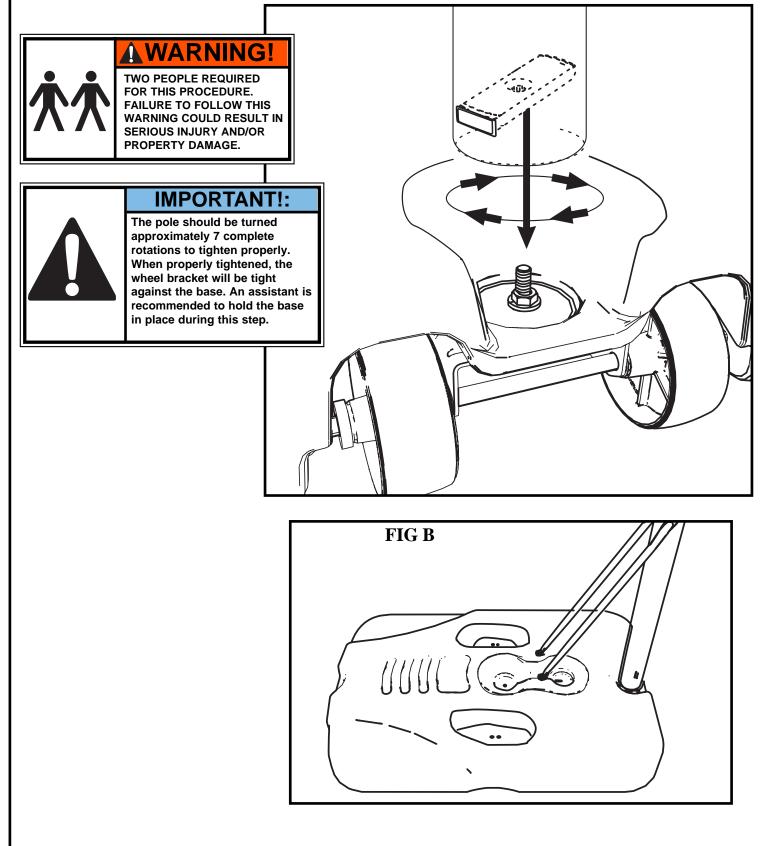

ONCE POLE SECTIONS ARE POUNDED TOGETHER- THEY CANNOT BE TAKEN APART

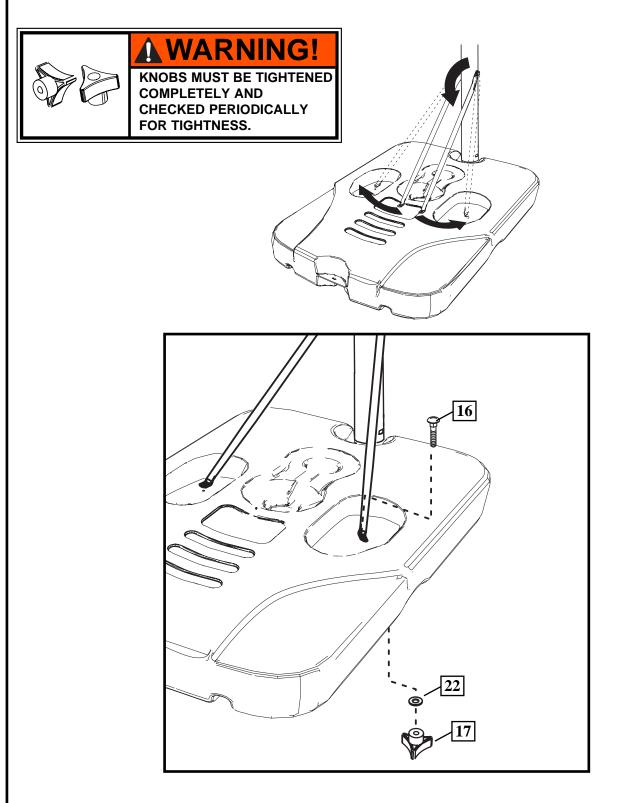

5.

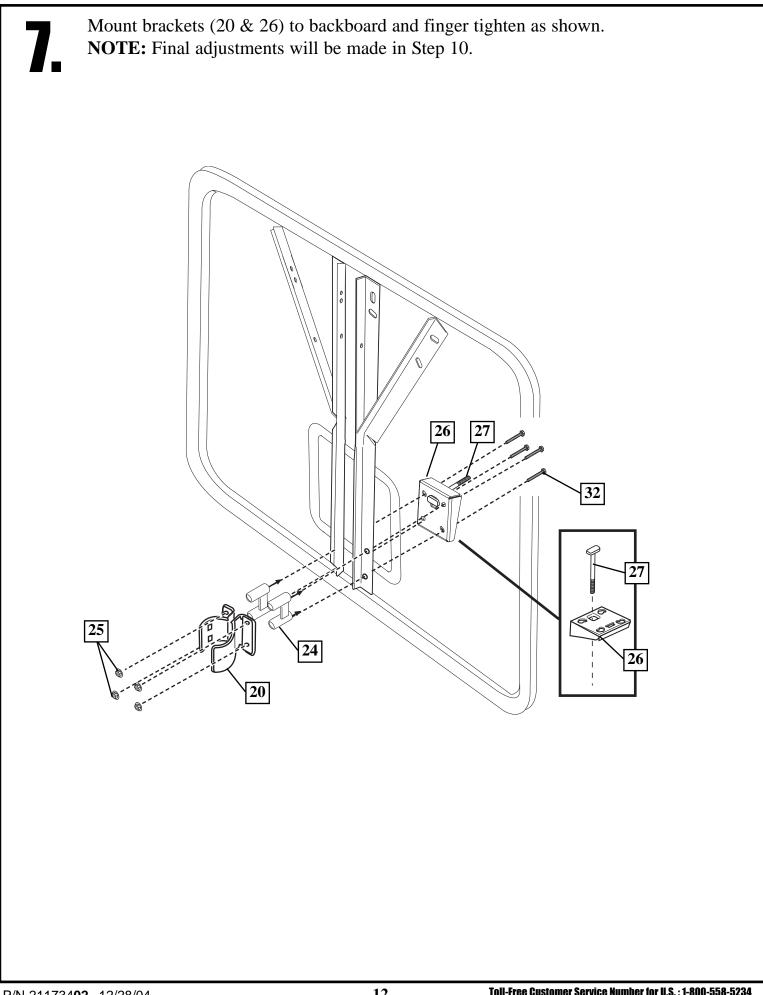

Attach pole assembly to tank assembly as shown. Secure pole assembly to tank and wheel bracket by turning the pole assembly clockwise as shown. Tighten pole completely and further rotate pole until struts are aligned correctly as shown in **FIG B**.

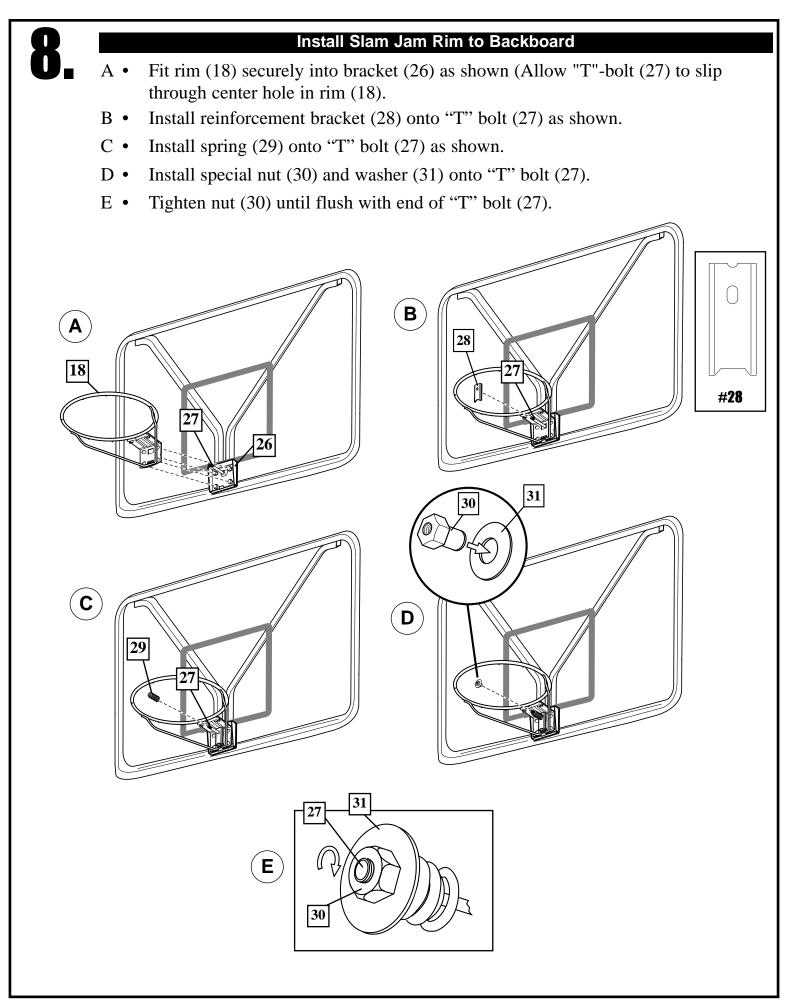

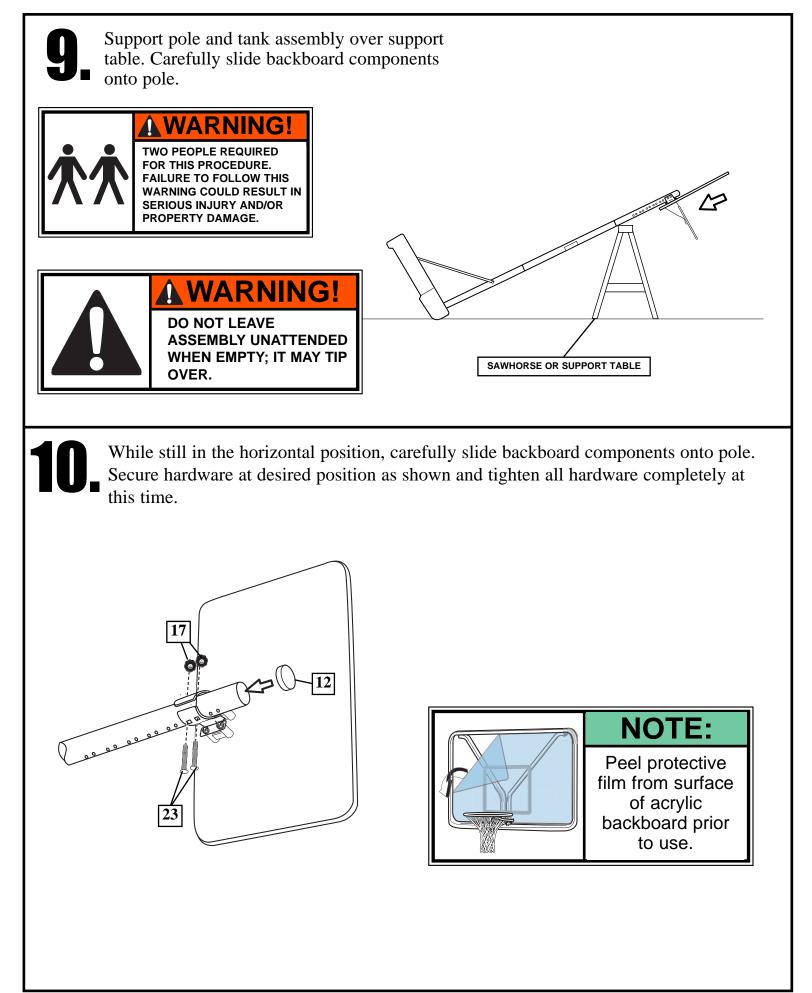

6.

Rotate struts down and bend struts outward to line up with holes on base as shown. Secure free ends of tank struts to tank with carriage bolt (16), washer (22), and knob (17) as shown. Repeat for other side.

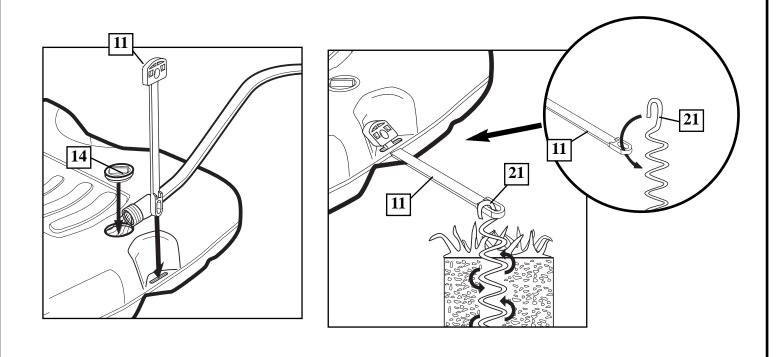

Place assembled unit in desired location. Fill tank with water (26 gallons/98.4 liters) or sand (approx. 360 lb./163 kg) and snap tank cap (14) in place.

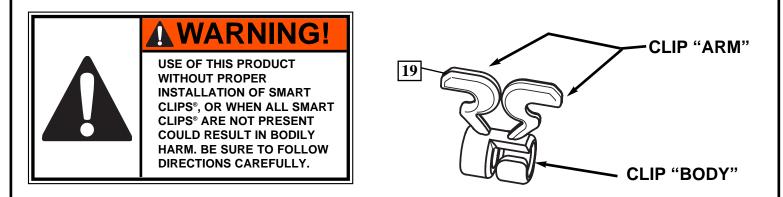

Insert T-strap (11) through slot on back of base as shown. Secure unit to ground by twisting tie down stake (21) into ground and hooking T-strap (11) onto tie down stake (21).

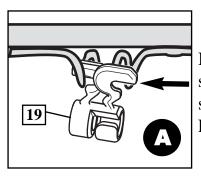

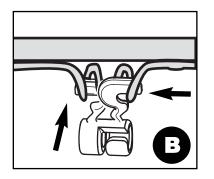

Attach net clips to rim as shown.

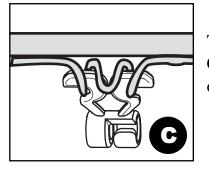

Insert one "arm" of clip into ram as shown. Twist "body" of clip slightly so that second "arm" slides over the top of the first "arm" as shown.

Push in direction indicated by arrows.

Push second "arm" back and into ram as shown.

Twist "body" of clip slightly again to spread "arms" of clip. Clip "arms" must be flat and touching edge to edge as shown, not overlapping.
